No part of this publication may be reproduced or transmitted in any form, or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1982 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 23

Number 1, January 1982

MAGNUS BUNDGAARD AND JØRGEN FRØKJÆR-JENSEN. Functional Aspects of the Ultrastructure of Terminal Blood Vessels: A Quantitative Study on Consecutive Segments of the Frog Mesenteric Microvasculature	1
MURRAY A. KATZ. System Analysis of Vascular Membrane Water and Protein Transport: General Method and Application to Canine Hind-quarters	31
HOLGER KIESEWETTER, HARTMUT RADTKE, NORBERT KÖRBER, AND HOLGER SCHMID-SCHÖNBEIN. Experimental Calibration of a Two-Stage Prism-Grating System for Measuring Cell Velocity	56
KNOWLES A. OVERHOLSER, JAHAR BHATTACHARYA, AND NORMAN C. STAUB. Microvascular Pressures in the Isolated, Perfused Dog Lung: Comparison between Theory and Measurement	67
BRUCE A. HARMS, BALAZS I. BODAI, GEORGE C. KRAMER, AND ROBERT H. DEMLING. Microvascular Fluid and Protein Flux in Pulmonary and Systemic Circulations after Thermal Injury	77
G. BROTZU, G. DIAZ, R. CHERCHI, M. R. SADDI, M. CARTA, AND G. SAVONA. A Chemotactic Relationship between Skeletal Muscle Nuclei and Capillaries	87
TOSHIO OHHASHI AND TAKEHIKO AZUMA. Effect of Potassium on Membrane Potential and Tension Development in Bovine Mesenteric Lymphatics	93
P. P. LAMBERT, B. AEIKENS, A. BOHLE, F. HANUS, S. PEGOFF, AND M. VAN DAMME. A Network Model of Glomerular Function	99
ABSTRACTS OF PAPERS PRESENTED AT THE INTERNATIONAL SYMPOSIUM ON MICROCIRCULATION, TOKYO, JULY 26, 1981	129

Number 2, March 1982

HAROLD WAYLAND. The Microcirculatory Society Eugene M. Landis Award Lecture. A Physicist Looks at the Microcirculation	139
BARBARA FARIS, PATRICIA MOZZICATO, ROCCO FERRERA, MICHAEL GLEMBOURTT, PAUL TOSELLI, AND CARL FRANZBLAU. Collagen of Brain Microvessel Preparations	171
CHARLES C. C. O'MORCHOE, K. H. ALBERTINE, AND P. J. O'MORCHOE. The Rate of Translymphatic Endothelial Fluid Movement in the Canine Kidney	180
MICHAEL A. MORRIS, JORGE A. LOPEZ-CURTO, SEAN P. F. HUGHES, KAI-NAN AN, JAMES B. BASSINGTHWAIGHTE, AND PATRICK J. KELLY. Fluid Spaces in Canine Bone and Marrow	188

O. HUDLICKÁ, B. W. ZWEIFACH, AND K. R. TYLER. Capillary Recruitment and Flow Velocity in Skeletal Muscle after Contractions	201
GEERT JAN TANGELDER, DICK W. SLAAF, HARRY C. TEIRLINCK, RINUS ALEWIJNSE, AND ROBERT S. RENEMAN. Localization within a Thin Optical Section of Fluorescent Blood Platelets Flowing in a Microvessel ...	214
BRIEF COMMUNICATION	
HARRY L. GOLDSMITH, PHIL GOLD, JOSEPH SHUSTER, AND KOICHI TAKAMURA. Interactions between Sphered Human Red Cells in Tube Flow: Technique for Measuring the Strength of Antigen-Antibody Bonds	231
ABSTRACTS OF PAPERS TO BE PRESENTED AT THE 1982 MEETING OF THE AMERICAN MICROCIRCULATORY SOCIETY HELD APRIL 24-25, 1982 AT NEW ORLEANS, LOUISIANA	239

Number 3, May 1982

F. R. MORAES AND J. GARCIA LEME. Endogenous Corticosteroids and Insulin in Acute Inflammation	281
J. C. FIRRELL, G. P. LEWIS, AND L. J. F. YOULTEN. Vascular Permeability to Macromolecules in Rabbit Paw and Skeletal Muscle: A Lymphatic Study with a Mathematical Interpretation of Transport Processes ...	294
WILLIAM I. ROSENBLUM AND FAROUK EL-SABBAN. Influence of Shear Rate on Platelet Aggregation in Cerebral Microvessels	311
RONALD J. KORTHUIS, C. Y. WANG, AND JERRY B. SCOTT. Transient Effects of Histamine on Microvascular Fluid Movement	316
SHARON M. SULLIVAN AND ROLAND N. PITTMAN. Hamster Retractor Muscle: A New Preparation for Intravital Microscopy	329
PAUL H. GUTH AND TERRY L. MOLER. The Role of Endogenous Prostanoids in the Response of the Rat Gastric Microcirculation to Vasoactive Agents	336
G. RUTILI, D. N. GRANGER, A. E. TAYLOR, J. C. PARKER, AND N. A. MORTILLARO. Analysis of Lymphatic Protein Data. IV. Comparison of the Different Methods Used to Estimate Reflection Coefficients and Permeability-Surface Area Products	347
ROSEMARY MAZANET AND CLARA FRANZINI-ARMSTRONG. Scanning Electron Microscopy of Pericytes in Rat Red Muscle	361
R. D. HOGAN, K. M. BURKE, AND T. D. FRANKLIN. The Effect of Ultrasound on Microvascular Hemodynamics in Skeletal Muscle: Effects during Ischemia	370
BRIEF COMMUNICATION	
P. GÖRÖG AND G. V. R. BORN. Increased Adhesiveness of Granulocytes in Rabbit Ear-Chamber Blood Vessels Perfused with Neuraminidase	380

TECHNICAL REPORT

 MARSHALL D. ELMORE AND PAUL C. JOHNSON. Compatible Multiplex
 Closed-Circuit Television and Analog Data Recording 385

ABSTRACTS OF PAPERS PRESENTED AT A MEETING OF THE BRITISH MICROCIR-
CULATION SOCIETY, SEPTEMBER 10 AND 11, 1981, ST. AIDAN'S COLLEGE,
UNIVERSITY OF DURHAM, DURHAM, ENGLAND 392

Information for Contributors

Microvascular Research (MVR) is an international journal dedicated to the dissemination of fundamental information related to the microvascular field.

Submission of Manuscripts. One original and two complete carbon copies should be sent via first-class mail, in flat form, to **Microvascular Research Editorial Office, Dr. David Shepro, 2 Cummings St., Boston University, Boston, Massachusetts 02215**. MVR will not be responsible for manuscripts lost in the mails.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Microvascular Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscript Style. Papers should be typewritten, double-spaced on one side of the paper, with wide margins. The manuscript should be divided into the following sections: Abstract, Introduction, Materials and Methods, Results, Discussion, References, and Acknowledgments. The abstract, which will precede each article, should be 225 words or less and should be typed on a separate sheet. In addition the manuscript should include, on separate pages, (1) the complete title with names of authors and affiliations (including ZIP CODE), (2) running title, consisting of no more than 40 characters including spaces, (3) key words that are suitable as **Index Descriptors**, and (4) the address to which proofs are to be mailed.

Tables. Tables are to be typed on separate sheets and numbered with Arabic numerals. Each table should contain an explanatory title that would make reference to the text unnecessary.

Figures. These should be numbered with Arabic numerals and should be mentioned consecutively in the text. Legends are to be typed together on a separate sheet.

Illustrations, drawn with a lettering set, should be in finished form ready for the printer. Lettering on the original drawing should be large enough (minimum, 4 mm) to be legible after reduction to one-third. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8.5×11 inches, with coordinates properly labeled; grid lines that are to show in the engraving should be linked in black.

Photographs should be submitted as glossy prints and not marred by staples, paper clips, or pencil marks. For best reproduction of halftones, provide clear, sharp photographs with adequate contrast. The best results will be obtained if authors match the contrast and density of all figures appearing on a single plate. If this is not possible, please provide unmounted original art. Providing an overlay that indicates the most critical areas of micrographs will also aid in ensuring high-quality reproduction. The dimensions of the printed page are 5×8 in. (127×203 mm). It is recommended that micrographs be submitted as near as possible to this size so that large reductions will not be necessary.

Color illustrations are acceptable, but at the author's expense. An excessive number of tables or illustrations may necessitate a charge to the author.

Footnotes. These should be designated in the text by superscript numbers and typed on a separate sheet; in the tables by superscript letters and typed at the bottom of the table.

Abbreviations. In general these should follow the usage employed by Chemical Abstracts. The Handbook for Authors of the American Chemical Society is also an acceptable guide.

References. Citations in the text consist of the author's name, and the year of publication in parentheses. The references should be listed alphabetically and should conform to the following style:

SIMIONESCU, N., SIMIONESCU, M., AND PALADE, G. E. (1978). Structural basis of permeability in sequential segments of the microvasculature of the diaphragm: I. Bipolar microvascular fields. *Microvasc. Res.* **15**, 1-16.

BELAMARICH, F. A. (1976). Hemostasis in animals other than mammals: The role of cells. In "Progress in Hemostasis and Thrombosis" (T. Spaet, ed.), Vol. 3, pp. 191-220. Grune and Stratton, New York.

Abbreviations of journal names should follow the style of Chemical Abstracts' *ACCESS, Service Source Index* (1969 Edition). Unpublished observations and personal communications should be cited in the *text* as such.

Reprints. Authors will receive 50 reprints at no charge. Additional copies may be ordered when galley proof is mailed.

Brief Communications. Preliminary reports will be reviewed for prompt publication; however, the comments must be restricted to no more than five typewritten pages, including references, tables, and illustrations. No abstract should be included.

To facilitate the publication of manuscripts, especially those papers based upon a new, theoretical concept, the Editors invite each contributor to submit the names of at least three scientists who could review the submitted manuscript.
